We are delighted to extend an invitation for you to support the Auburn VNA Health Network. **Auburn VNA Health Network**, a non-profit 501 (c)(3) organization founded in 1919, accomplishes its important mission with the generosity of our supporters. We continue to thrive and fulfill our mission of *“providing caring, high quality home healthcare services with emphasis on the unique needs of each individual”*.

This year we direct special attention to Pakachoag Gardens, our Adult Day Health Center, a 25+ year-old program dedicated to providing comprehensive weekday adult day health services. Designed as a place where “Seniors Blossom”, our program provides socialization, companionship, exercise, nutrition, emotional support, nursing, personal care, and so much more to seniors in our community. This September Pakachoag Gardens is moving to its new location of 203 Pakachoag Street. To expand our Center, maintain viability, and offer our services to more seniors, our dedicated team has partnered in creating a more robust, spacious facility. The renovations for upgrading have come at a cost and we are kindly requesting your support!

Other Auburn VNA Health Network community clinics and projects that will be benefit directly from your generous contributions are:

- The continuation of our “Free Care” program which provides complimentary access to those economically challenged in our community.
- The continuation of community clinics: Flu, Blood Pressure, Diabetes & Healthy Heart Education.
- The continuation of our “Sliding Scale” program at our Adult Day Health Program which provides a safe, warm environment for low-income seniors.

Thank you, and on behalf of everyone at Auburn VNA Health Network, we are honored to continue to provide you with outstanding clinical care!

With gratitude,

Kimberly M. Harmon BSN, RN
